Ref. Recognition 2012/JB

Dear Jacques Booysen

Data Scientist Award

It is with great pleasure that we wish to hereby formally document and recognize your contributions and performance in 2012.

This is motivated by your transformation from a software developer, into a Demand Intelligence modeller, where you now deploy your software, statistical and data processing skills in solving customer research projects, which take the form of Task Orders directly ascribed to you. You have always amazed both customer and peers on how you are able to investigate and conquer new (software and hardware) technologies, and deploy them to the customers benefit. You have thus started acting like a project owner, taking full accountability for the specification, research, modelling, delivery and final presentation to customer workgroups. You have excelled in this regard and have become a favourite of the EMESDS Steercom activity leaders such as Dineo Ratlhagana.

Well done on the academic paper that was authored and co-presented by you at the National Forecasting Conference in Nelson Mandela Bay, and on the invitation, for you to convert your spatial interpolation work into a fully-fledged, peer reviewed, academic journal paper. Given that you can now be entrusted to take accountability of high level academic research, and that you have over the years developed a toolbox (in terms of statistics and software development) to do this, it is only fitting that we can now start relying on you as an independent project owner.

We thank you for the efforts that you have put in over the year and the new level of commitment and achievement that we have become aware of. Well Done!

Sincerely

Mr R Surtees

Enerweb Managing Director

Dr GL Van Harmelen

Enerweb DI Manager

Mr P Ramjith

Enerweb DI Director
