Dear Rob, Santego, Kobus

JACQUES BOOYSEN – LETTER OF COMMENDATION

Herewith a letter of commendation to Jacques Booysen, whom I have had the privilege of working together with, on the EnerFlow (wolf-stack) project, for about 3 months now, since its inception.

In terms of the EnerFlow product, and specifically the technology on which it is being build, it is undoubtedly, and almost entirely, the brainchild of Jacques. Not only has he successfully been applying his wide experience in terms of architectures and software technologies to this project, but Jacques is also showing exceptional insight, and foresight, into where this product is going.

His contributions are already proving invaluable, and will positively influence how it will be utilized in future, and specifically how the technology is being architected to ensure that we deliver excellent and super-fast, customer centric, Enerflow applications, running in the AWS cloud.

In particular, Jacques has been picking up on our current (CityPower customer) priorities, and responding immediately, spending “all-nighters” so that we could achieve demonstration deadlines, with only a day or two notice in some cases.

It is truly an honour to be allowed to work with such exceptional talents, and especially when those talents and skills are deployed with so much positivity and humility.

Yours sincerely

DR GL van Harmelen
DISRUPTIVE INNOVATION
