Dear Sir/Madam,

I am writing to express my interest in the (Senior) Energy Data Scientist role within your Data Science team. I am a highly motivated and skilled data scientist with extensive knowledge and experience in data science and the energy sector.

I have been working at Enerweb, a leading energy company, for over 20 years as an software engineer and energy data scientist. I have gained extensive experience in time series forecasting, network analysis, and energy system modelling. Additionally, I have a deep understanding of the players in the energy sector and am well-informed about current developments.

Furthermore, I am an independent and entrepreneurial professional who is capable of optimising work processes and procedures. My native language, Afrikaans, is very close to Dutch and I am fluent in both Afrikaans and English.

I am also a quick learner and am eager to develop my expertise in the field.

I am excited about the opportunity to contribute to the realisation of the energy transition and to take on responsibilities in project and stakeholder management.

I am confident that my passion for data science and my ability to work in a multidisciplinary environment will make me a valuable addition to your team. I have reference letters available upon request, which will provide further insight into my work and achievements at Enerweb.

I am impressed by the competitive salary and attractive employment package offered, as well as the opportunities for personal and professional development within your company. I am eager to work in a dynamic and international environment and to have the flexibility to work from home, at the customer's location, or at your office in Amsterdam.

Thank you for considering my application. I look forward to the opportunity to further discuss my qualifications and enthusiasm for this role.

Sincerely,

Jacques Booyesen
