EDUCATION

University of Virgina Expected Apr 2023
Master of Science: Data Science Charlottesville, VA

Brigham Young University

Apr 2020

Bachelor of Arts: Computational Political Science

Provo, UT

Thesis: Political Message Detection and Likeability in Films (n=1000 survey)

EXPERIENCE

DynataAug 2022-PresentData ScientistHerndon, VA

Morning Consult
Senior Data Analyst

Nov 2021-Aug 2022
Washington, D.C.

- Over 300+ requests, pulled data from API or large database into R, wrangled data using R, and output figures and tables
- In conjunction with other data scientists on a large project, developed and performed statistical tests on time series data in 17 surveys of 5 countries in over 200 tables
- Led project to build a Python Web Bot (Selenium) to automate generation of test cases in surveys, contributed this to data science code base (used by 60+ data scientists), saving company \$10,000s in time and errors

Echelon InsightsResearch Analyst

April 2020-Nov 2021
Alexandria, VA

- Led in modeling projects predicting election turnout for entire U.S. in 2022, phone response rates, etc.
- Wrangled, cleaned, weighted, or made presentations for 60+ survey datasets with R, SQL, and AWS
- Using R Shiny, built a codeless-crosstab tool for company's research team

Center for Elections and Democracy

Undergraduate Research Fellow

Dec 2018-April 2020 Provo, UT

- Designed and executed multiple survey experiments in original research projects
- Mentored 60+ students in solving econometrics problems in weekly office hours
- Visualized data using R creating 50+ informative figures for the AFS official report, news outlets, and professor's projects

PERSONAL PORTFOLIO PROJECTS

Bayesian County-Level School Shooting Analysis

August 2022

• Compared and estimated several Bayesian Regression models with PYMC3 in Python. Ultimately, used hierarchal negative binomial model to predict shootings and make inferences about gun laws

Weekly COVID Email Update

November 2021

- Fully automated workflow (Github Actions) taking latest CDC data, transforming into visualizations, and sending informative email every Saturday morning to subscribers made in R
- encrypted all API tokens via custom encryption (R package Sodium) + github environment variables so repository can be publicly viewable
- · Each subscriber recieves national data and state-level data customizable to their home state

US 2020 Election Model November 2020

- Created visualization dashboard with plotly displaying daily results of statistical model
- Generated 1000 simulations daily of election winner based on a probabilities from model for each state

• Modeled and adjusted for survey error using fixed effects regression
